

FLOCK TOGETHER TO FIGHT BREAST CANCER

You've been flocked

by: _____

STEP 1: Help raise awareness of breast cancer while helping the Health Care Foundation of North Mississippi raise funds to benefit area breast cancer survivors.

- The flock in your yard should migrate within 24 to 48 hours.
- If you'd like to donate any amount of your choosing online, please visit nmhsfoundation.org/breast-cancer-center.
- If you prefer to mail a check vs. donate online, that is possible too. Please mail to: HCF, 830 S. Gloster St., Tupelo, MS 38801.
- If you appreciate the "flocking" but cannot donate at this time, we understand. Please help us raise breast cancer awareness by moving the birds to roost in the next yard – see Step 2.

STEP 2: Print out the "You've Been Flocked" letter like this one from www.nmhsfoundation.org, fill it out and replace in the plastic sleeve.

STEP 3: Go "flock" someone else and have them help local patients too. Please move all of the following items to the next yard:

- The set of six flamingos
- The yard sign
- The "You've Been Flocked" letter you filled out that should go into plastic sleeve around one of the flamingos.

STEP 4: When you "flock" your friends, take a photo of the flamingos in their yard (be careful to not include house numbers for safety purposes) and challenge them on Facebook and Instagram. Tag them and Health Care Foundation of North Mississippi and add the hashtag: #flocktogether2022.

We appreciate your support of this fun awareness and fundraising campaign. However, breast cancer is no laughing matter. Donations to HCF help support our patients' physical, emotional and financial needs.

We hope you enjoyed the surprise flocking and appreciate the spirit in which it was intended. Now, go flock a friend! If you are unable to help the flock migrate to another yard, contact (662) 377-2481 and our staff will remove these pesky but lovable birds from your yard.

P.S. The "caretaker" who has the flock on Nov. 1, kindly contact us so we can pick up the birds.
