

Program Information

This program is designed to meet the needs of various professionals who are involved with all levels of caring for patients. You will gain insight into multidisciplinary approaches to treatment of a variety of patients.

Who Should Attend

- Physical Therapists & Assistants
- Occupational Therapists & Assistants
- Certified Athletic Trainers

Program Objectives

- Increase knowledge of providing rehabilitative care for patients in various stages of recovery
- Increase understanding of the multidisciplinary team approach to patient care
- Increase knowledge of assessment and treatment skills in discipline-specific areas including, but not limited to: ethical issues in the use of social media, the future of health care delivery and therapy practice; acute rehabilitation; assistive technology; affordable care organization; tubes, lines and braces; knee and hip replacement; pediatrics topics including multi-disciplinary needs, parental issues and wheel-chair technology; home modifications; spinal injury rehabilitation; hand and wrist injuries and splinting; Alzheimer's evaluation; lymphedema and women's health.

Agenda

Sessions are not appropriate for all specialties. In order to receive continuing education credit for attendance, you must attend only sessions which have been approved for your specialty.

Friday, April 5, 2024

Location

This conference will be held in NMMC's North Education Center, 830 South Gloster Street, Tupelo, Mississippi. Enter the front entrance of the hospital, take elevator to the first floor and follow the signs.

Parking

Non-NMMC employees should park in the visitors' southeast parking lot on Garfield Street, located across from NMMC, between the Center for Digestive Health and the Vein Center.

Other Information

NMMC fully complies with the legal requirements of the ADA and the rules and regulations thereof. If any participant of the education activity presented by NMMC is in need of special accommodations, please email addressingrehabneeds@gmail.com at least two days prior to the activity.

We make every effort to keep our conference room temperatures as comfortable as possible. However, some individuals find a sweater or jacket helpful.
